

# Self-supervised Learning for image classification on DeepFashion

Dusan Mihajlov, Pinar Goktepe, Michael Baur

May 21, 2019

DeepFashion dataset

Our solution

Results

Conclusions

# DeepFashion

- ▶ 289222 images
- ▶ 48 classes (Hoodie, Jeans, Jumpsuit, ...)

# Preprocessing

- ▶ Random crop to the smaller size (width or height)
- ▶ Resize to 227x227

# Self-supervised Learning

- ▶ 70% of the dataset
- ▶ Jigsaw Puzzle (3x3 tiles)
- ▶ AlexNet
- ▶ Optimizer: Adam with constant learning rate 0.0001

# Classification

- ▶ AlexNet initialized with the weights of the self-supervised part
- ▶ Optimizer: Adam with constant learning rate 0.001

# Results

# Conclusions
